Alliance of Indiana Rural Water is pleased to offer training for Indiana’s Water and Wastewater Professionals.

Join us for the class:

Traffic Safety & Operator Responsibilities and Ethics

**Traffic Safety** - The Manual of Uniform Traffic control Devices states: “during any time the normal function of a roadway is suspended, temporary traffic control planning must provide for continuity of function. Effective temporary traffic control enhances traffic safety and efficiency. Effective temporary traffic control must provide for the safety of workers, road users, and pedestrians. At the same time, it must provide for the efficient completion of whatever activity suspended normal use of the roadway.” Attend this session and learn what an effective program consists of.

**Operator Responsibilities & Ethics** - The position of operator requires highly ethical behavior as operators often do not have someone looking over their shoulder watching their every move. This session will cover responsibilities and ethics with respect to properly conducting the duties of an operator and the possible consequences of failing to operate in an ethical manner.

Course Instructor: Sherri Winters - Alliance of Indiana Rural Water

Cost: $95 members / $125 non-members

* Cancellations within 1 week of the class will be subject to a $15 administrative fee per registered person.
